Re: Mid-Channel Diversion Alternative

Dear Sirs:

A

I am in favor of the preferred alternative. I strongly support the proposed restoration of the American River. I urge you to take advantage of this opportunity to restore a free flowing American River.

Thanks for your attention to this matter.

Sincerely,

Steve Healow

RE: American River Tunnel Closure- Support Closure and Restoration

To whom it may concern:

I would like to register my support for closure of the diversion tunnel on the North Fork American River. I understand public comment is now being solicited. Please consider this letter as my official comments and enter it into the official record.

I support the preferred alternative (the "Mid-Channel Diversion Alternative") because it will return water to the natural riverbed and restore the river channel, as well as close the tunnel. The other alternatives proposed offer no river restoration and no tunnel closure.

The preferred alternative also restores boatable conditions and flows to this now-dry reach of river, and begins to set the stage to provide public access to the Confluence Parkway - the long closed reach of the American River from the confluence of the North and Middle Forks of the American River to Folsom Reservoir.

I have spent some time hiking the area and would like to see water returned to its natural course. I was in the area Sept of '98 & '99 and really enjoyed the hiking opportunities. This is a fantastic area and the diversion tunnel should be closed. I feel most of us (hikers, bikers, boaters) agree on this issue and would bring added tourist dollars to the area.

It is time to restore the river so that everyone can use it again. Thank you for considering my input.

Sincerely,

Scott Olsen

The American River Pump Station Project,
Draft EIS/EIR Comments
Surface Water Resources
2031 Howe Avenue Suite 110
Sacramento, CA 95825

10/23/01

As an avid paddler, hiker, and horseback rider in the American River area, I urge you to approve the "Mid-Channel Diversion Alternative". The other alternatives proposed offer NO river restoration and NO tunnel closure.

A

PLEASE CLOSE THE AUBURN DAM DIVERSION TUNNEL AND RESTORE THE AMERICAN RIVER at the Auburn Dam construction site to its natural channel, and also provide the water agency with riverside pumping and diversion facilities to supply water to customers in Placer County.

This preferred alternative also restores BOATABLE CONDITIONS AND FLOWS to this now dry reach of river, and begins to set the stage to provide public access to the Confluence Parkway.

Please let me know of future actions on this issue.

Thank you,
Suzanne Ferroggiaro

COMMENTS:	
The Mid-Channel Diversion should be restored to the original flow and close the diversion tunnel so PCWA can set up permanent pump stations. To provide the needed water resources for the area.	
Thank you Ken Magee
